

# Gradient Descent Tips

Tip Three: Feature Scaling

# Feature Scaling: Part I

$$y = b + w_1x_1 + w_2x_2$$

Make different features have the same scaling

# Feature Scaling: Part II

$$y = b + w_1x_1 + w_2x_2$$

# Feature Scaling: Part III

For each  
dimension  $i$ :  
mean:  $m_i$   
standard  
deviation:  $\sigma_i$

$$x_i^r \leftarrow \frac{x_i^r - m_i}{\sigma_i}$$

The means of all dimensions are 0,  
and the variances are all 1.
